TRAIL

STREAM

Working Woods is a 67-acre living laboratory and demonstration site for forest management techniques. Our award-winning program helps people manage, protect, and create thriving woodlots in our region. Scan the QR code for more info.

There are two options to access Working Woods from the visitor's center:

South Working Woods

- Non timber forest products demo
- Edge feathering area
- Sustainable timber harvest demo
- Member parking

North Working Woods

- Improvement cut demo

Crosswalks and additional trail maps exist at both entrances
